

Environmental Zones Fleet-Service

All European badges and registrations

secure and quickly from a single source!

For transport and bus companies, the procurement of environmental badges and entry registrations for national environmental zones in Europe is an extremely cumbersome and time consuming matter.

When ordering a badge, not only Euro classes, registration year, type specification and other special features if the vehicle is retrofitted have to be taken into account, but also the commercial, fiscal and administrative features of the respective procurement sources.

As an information portal for all diesel driving ban zones and environmental zones, Green-Zones offers freight forwarders, transport and bus companies the purchase in a central shop of all environmental badges and entry registrations of European countries and cities from a single source.

The fleet customer is given a detailed overview of all available badges, vignettes and vehicle registrations and of all vehicle types and EU standards according to the registration date, which can be purchased in Europe.

The Green-Zones special services are:

- ✓ Order possible in 10 languages
- ✓ Personal contact by phone, fax, e-mail
- ✓ Personal Key Account Manager
- ✓ Upload of vehicle documents up to 15 MB
- ✓ Delivery status enquiries
- ✓ Invoice for tax purposes
- ✓ Express delivery service for many badges
- ✓ Fleet and bulk orders via Excel list
- ✓ Payment by bank transfer and credit card
- ✓ All badges/registrations from a single source
- ✓ Electronic pre-delivery of badges

All badges - Single order!

Who is Green-Zones

Green-Zones is the European procurement portal for national environmental badges and vehicle registrations required for accessing the respective national and regional environmental zones and low emission zones in Europe. Furthermore, in its web portal and **Green-Zones app**, Green-Zones provides general information on European environmental zones for **tourists and private travellers**.

Through the **Green-Zones Fleet-App**, professional **transport and bus companies** receive daily real-time information on rules and exemptions in the environmental zones, as well as push notifications and warnings on entry bans in temporary environmental zones in Europe.
